1 Preface

1.1 Legal Statements

Copyright 2009 - 2010 Netconf Central, Inc., All Rights Reserved.

1.2 Restricted Rights Legend

This software is provided with RESTRICTED RIGHTS.

Use, duplication, or disclosure by the U.S. Government is subject to restrictions set forth in subparagraph (c)(1)(ii) of the Rights in Technical Data and Computer Software clause at DFARS 252.227-7013 or subparagraphs(c)(1) and (2) of the Commercial Computer Software - Restricted Rights at 48 CFR 52.227-19, as applicable.

The "Manufacturer" for purposes of these regulations is Netconf Central, Inc., 374 Laguna Terrace, Simi Valley, California 93065 U.S.A.

1.3 Additional Resources

Depending on the version of Yuma you purchased, other documentation includes:

- Yuma Tools® Quickstart Guide
- Yuma Tools® User Manual
- Yuma Tools® Developer Manual

To obtain additional support you may email InterWorking Labs at the e-mail address
yuma-support@iwl.com

There are several sources of free information and tools for use with YANG and/or NETCONF.
The following section lists the resources available at this time.

1.3.1 WEB SITES

- **Yuma Tools Home Page**
 - <http://yuma.iwl.com/>
 - Official home page for Yuma Tools information
- **Netconf Central**
 - <http://www.netconfcentral.org/>
 - Free information on NETCONF and YANG, tutorials, on-line YANG module validation and documentation database
- **Yang Central**
 - <http://www.yang-central.org>
 - Free information and tutorials on YANG, free YANG tools for download

Yuma Tools Installation Guide

- **NETCONF Working Group Wiki Page**
 - <http://trac.tools.ietf.org/wg/netconf/trac/wiki>
 - Free information on NETCONF standardization activities and NETCONF implementations
- **NETCONF WG Status Page**
 - <http://tools.ietf.org/wg/netconf/>
 - IETF Internet draft status for NETCONF documents
- **libsmi Home Page**
 - <http://www.ibr.cs.tu-bs.de/projects/libsmi/>
 - Free tools such as smidump, to convert SMIv2 to YANG

1.3.2 MAILING LISTS

- **NETCONF Working Group**
 - <http://www.ietf.org/html.charters/netconf-charter.html>
 - Technical issues related to the NETCONF protocol are discussed on the NETCONF WG mailing list. Refer to the instructions on the WEB page for joining the mailing list.
- **NETMOD Working Group**
 - <http://www.ietf.org/html.charters/netmod-charter.html>
 - Technical issues related to the YANG language and YANG data types are discussed on the NETMOD WG mailing list. Refer to the instructions on the WEB page for joining the mailing list.

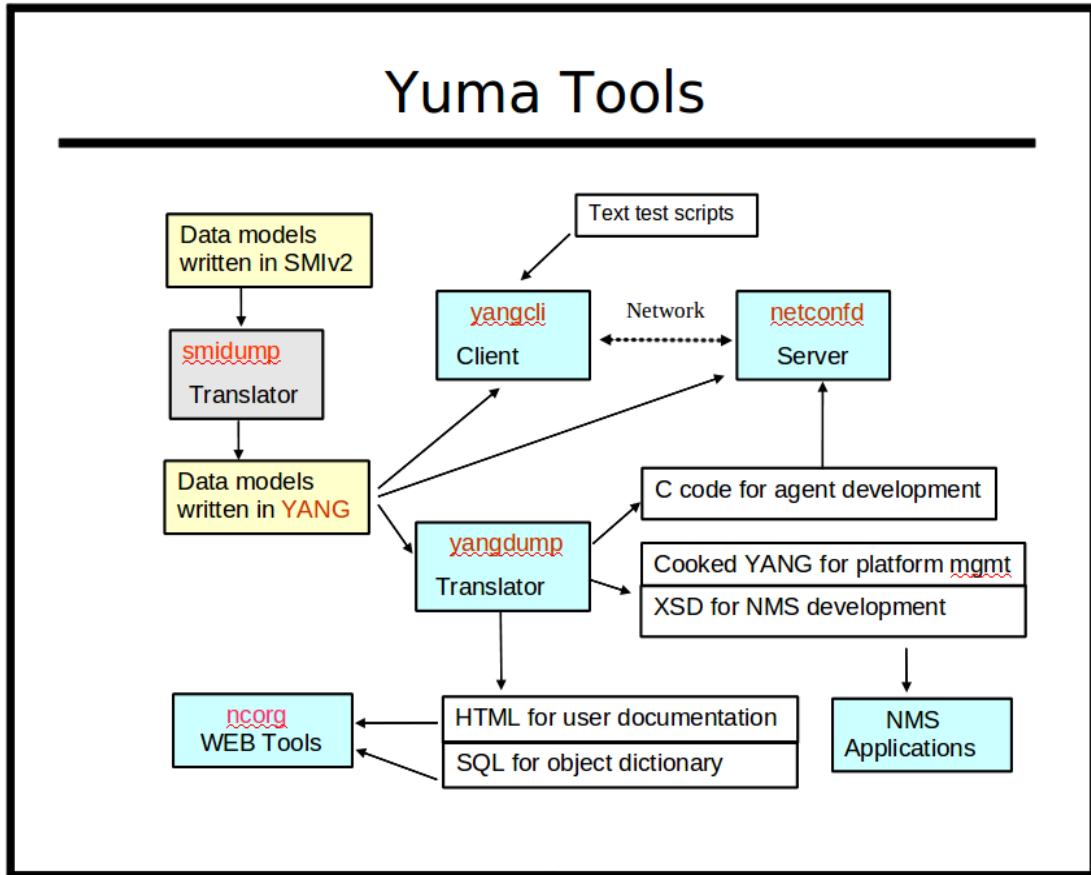

1.4 Conventions Used in this Document

The following formatting conventions are used throughout this document:

Documentation Conventions

Convention	Description
--foo	CLI parameter foo
<foo>	XML parameter foo
foo	yangcli command or parameter
\$\$FOO	Environment variable FOO
\$\$foo	yangcli global variable foo
<code>some text</code>	Example command or PDU
some text	Plain text

2 Introduction

Refer to section 3 of the Yuma User Manual for a complete introduction to Yuma Tools. This section focuses on the client and server tools within the Yuma Tools programs.

2.1 Intended Audience

This document is intended for users of the Yuma Tools NETCONF client and server programs. It covers the installation of the Yuma Tools packages.

2.2 Yuma Packages

The Yuma Tools programs are divided into several packages, depending on the version of Yuma Tools that was purchased:

- **yuma-shlibs:** Contains the libncx shared library used by all Yuma Tools programs
- **yuma-client:** Includes the NETCONF client program, and programs to process YANG files
- **yuma-server:** Includes the NETCONF server programs

Yuma Tools Installation Guide

- **yuma-dev**: Includes tools, make files, and header files needed for a developer to create server instrumentation libraries for use with the yuma-server package
- **yuma-sdk**: Includes the complete Yuma Tools source code, and tools for customizing the NETCONF server for use in embedded operating systems

3 Installation Requirements

The following requirements must be met for Yuma Tools to be installed.

3.1 Supported Platforms

The following platforms are supported at this time for the Yuma binary packages:

- Ubuntu version 9.10 (32 bit x86 and 64-bit AMD)
- Fedora version 10 and 12 (32 bit x86)

The **yuma-sdk** package contains source code which can be built on many other platforms that support the Gnu C compiler.

3.2 External Packages

The following programs and libraries need to be available for Yuma Tools to work.

3.2.1 LIBXML2

The libxml2 package is needed by the yuma-shlibs package for some of the XML parsing tasks.

3.2.2 LIBSSH2

The libssh2 package is need by the yuma-client package for client-side SSH protocol support.

3.2.3 NCURSES

The curses library is needed by the yuma-client package for some terminal support.

3.2.4 LIBSSL

The SSL library is needed by libssh2 package to process the SSH protocol.

4 Quick Installation

This section describes how to use the platform package manager program to install the Yuma Tools programs.

4.1 Ubuntu

Yuma Tools Installation Guide

First, make sure the external libraries are installed.

```
mydir> sudo apt-get install libxml2 libssh2 ncurses
```

Next, install the Yuma Tools shared libraries. Here is an example.

The actual yuma-shlibs revision and hardware platform may be different:

```
mydir> sudo dpkg -i yuma-shlibs_0.10-2_amd64.deb
```

After the shared libraries are installed, then the yuma-client and/or yuma-server packages can be installed:

```
mydir> sudo dpkg -i yuma-client_0.10-2_amd64.deb
```

```
mydir> sudo dpkg -i yuma-server_0.10-2_amd64.deb
```

4.2 Fedora

First, make sure the external libraries are installed.

```
mydir> sudo yum install libxml2 libssh2 ncurses
```

Next, install the Yuma Tools shared libraries. Here is an example.

The actual yuma-shlibs revision and hardware platform may be different:

```
mydir> sudo yum localinstall yuma-shlibs_0.10-2_amd64.deb
```

After the shared libraries are installed, then the yuma-client and/or yuma-server packages can be installed:

```
mydir> sudo yum localinstall yuma-client_0.10-2_amd64.deb
```

```
mydir> sudo yum localinstall yuma-server_0.10-2_amd64.deb
```
